Education

2007 - 2009
Master of Science
Polsko-Japońska Akademia
Technik Komputerowych w Warszawie

2004 - 2007
IT Engineer
Polsko-Japońska Akademia
Technik Komputerowych w Warszawie

Skills

- Javascript
- Typescript
- Node
- React
- NestJS
- .NET
- Databases
- DevOps
- AI

Profile

For over **20 years** I have been designing and implementing web applications and tools to optimize business processes. I'm constantly improving my skills, expanding my knowledge and learning the latest technologies. I always care about the quality and safety of created solutions. I am not afraid to use **AI** to increase productivity. I use tools like Github Copilot on regular basis. Solving real problems gives me the greatest satisfaction and motivation.

Experience

Software Engineer | Curvestone
May 2021 - Present

I design and implement state-of-the-art Node and .NET applications using NestJS, ABP Framework, Azure, and MSSQL databases. I create integrations with Databricks, ML services and external APIs. Implementation of tools using AI and OCR for document processing and business process optimization. As an **ISO 27001** company, we care about the highest safety and quality standards.

Founder, Lead Software Engineer | Coredata
Jan 2020 - Present

At Coredata I focus on continuous development and I'm open to new opportunities. I deal with consulting and customer service in the field of IT solutions. I design and implement web applications using the latest technologies. I create tools for automating business processes using data-driven ML technology.

Software Developer | Geotik
Dec 2016 - Apr 2021

I implemented an Angular applications integrated with the Node REST API. I designed and developed a driver scoring system using SignalR and MSSQL with an integrated Datacenter. I worked on process and workflow automation using the n8n.io tool.

Software Developer | T-matic Systems
Feb 2009 - Dec 2016

I've designed complex solutions from UI/UX (ExtJS, MVVM) to backend (PHP, .NET). I've also developed intelligent control systems and scoring algorithms, as well as DataCenter and Data Warehouses solutions.
